Prasad Sudhakar

Contact Information

Research Scientist
GE Global Research, JFWTC
Bangalore, KA, 560066 INDIA

Research Interests

Structured models for ill-posed inverse problems, machine learning methods in medical data processing, theory of deep learning, convex optimization

Education

INRIA Rennes - Bretagne Atlantique, Rennes, France

Ph.D. in Signal Processing, February 2011

- Thesis Topic: "Sparse Models and Convex Optimization for Convolutive Blind Source Separation"
- Advisor: Rémi Gribonval

Indian Institute of Science, Bangalore, India
Department of Electrical Engineering

M.Sc.(Engg.), Systems Science and Signal Processing, February, 2007

Bangalore University, India

B.E., Computer Science and Engineering, September, 2000

Honors and Awards

INRIA CORDIS - French government scholarship for doctoral studies, 2007-2011

Student travel grant from IBM India Research to participate in ICME 1993, in Toronto, Canada

Academic Experience

Univérsité catholique de Louvain, Louvain-la-Neuve, Belgium

Postdoctoral research assistant **September, 2011 - May, 2014**

Included teaching the following courses, along with Prof. Benoit Macq

- Information Theory and Coding, Spring 2013, 2014
- Digital Signal Processing, Spring 2013

Indian Institute of Science, Bangalore, India

Visiting researcher **June, 2013 - August, 2013 and January, 2014**

Included teaching the following course, along with Prof. K. R. Ramakrishnan

- Selected Topics in Image Processing, Fall 2013

Ecole Polytechnique Federale de Lausanne, Lausanne, Switzerland

Visiting researcher **January 2011**

IIT Bombay, Electrical Engineering department, Mumbai, India

Research assistant **July 2003 - December 2003**

Publications

1. P. Sudhakar, L. Jacques, X. Dubois, P. Antoine and L. Joannes, Compressive imaging and characterization of sparse light deflection maps, SIAM Journal on Imaging Sciences, 8(3), 1824-1856, 2015.

2. A. Benichoux, P. Sudhakar, F. Bimbot and R. Gribonval, Well-posedness of the frequency permutation problem in sparse filter estimation with ℓ^p minimization, Applied and Computational

Harmonic Analysis, 35(3), pp. 359-540, November 2013.

Papers in preparation

1. P. Sudhakar, R. Madhavan and S. E. Joel, A new group clustering method for fMRI data analysis.

2. P. Sudhakar and R. Gribonval, Double sparsity for estimating mixing filters in blind stereo source separation.

Peer reviewed conference papers

1. A paper on transfer learning of deep CNNs for medical imaging problems submitted to MICCAI 2016. (Title and full author list not mentioned due to obligation of anonymity with MICCAI)

2. A. Adiga, S. Mulleti, P.Sudhakar and C. S. Seelamantula, Two-Dimensional FRI Signal Reconstruction Using Blind Deconvolution, SampTA 2015.

3. P. Sudhakar and P. K. Ghosh, Recognition benefit of articulatory features from acoustic-to-articulatory inversion using sparse smoothing, Interspeech 2014, Singapore.

4. P. Sudhakar, L. Jacques and P. K. Ghosh, A sparse smoothing approach for Gaussian mixture model based acoustic-to-articulatory inversion, ICASSP 2014, Florence, Italy.
